# Report Information

## Purpose:

To provide Florida Emergency Medical Services (EMS) information regarding the total incidents, total patient contacts, and total transports for year 2010.

## Definitions:

**Organizational Type** is defined as the organizational structure from which EMS services are delivered (fire, hospital, county, etc.). The organizational types used within this report are derived from the National Emergency Medical Services Information System (NEMSIS).

**Total Incidents** is defined as the total number of EMS events that were submitted by each licensed EMS provider.

**Total Patient Contacts** is defined as the total numbers of patients that are responded to by each licensed EMS provider.

**Total Transports** is defined as the total number of times that an EMS unit responded to an EMS event that resulted in a patient being transported to destination.

## Data Sources

The data in this report were derived from the Emergency Medical Services Tracking and Reporting System (EMSTARS), the Prehospital Aggregate System, and the Customer Oriented Medical Practitioner Administration System (COMPAS) licensure database. All three databases are maintained by the Florida Department of Health.

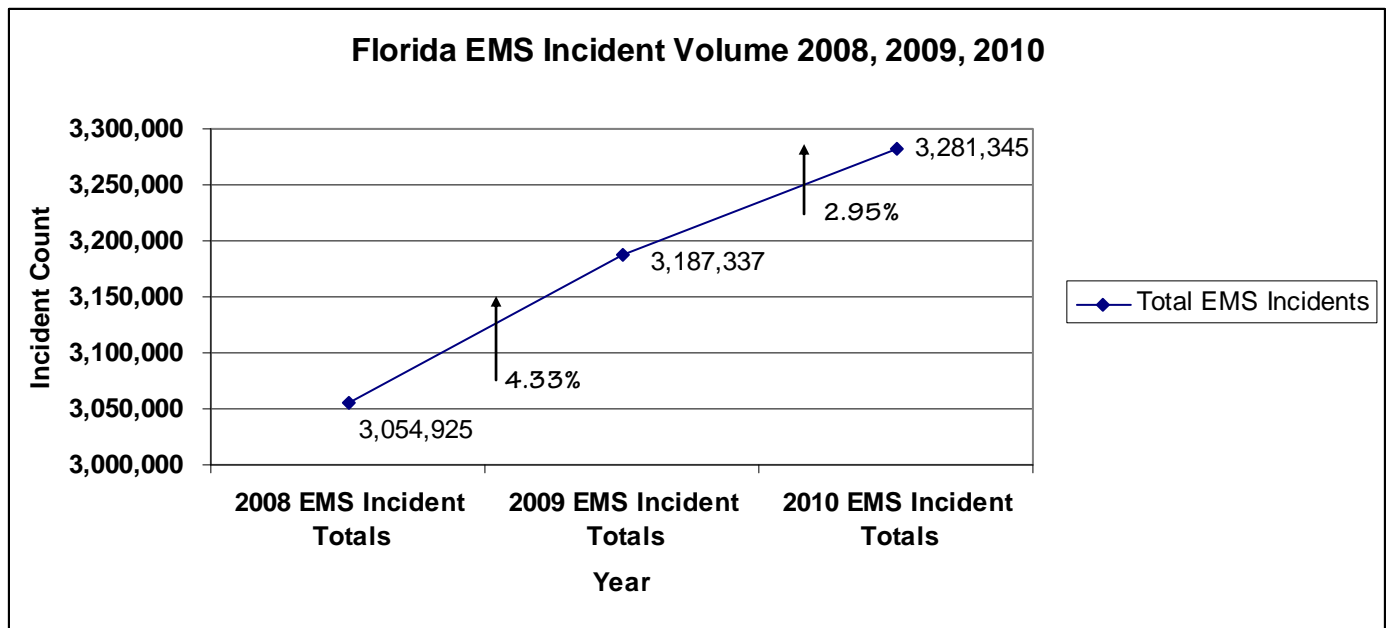

## Time Frame

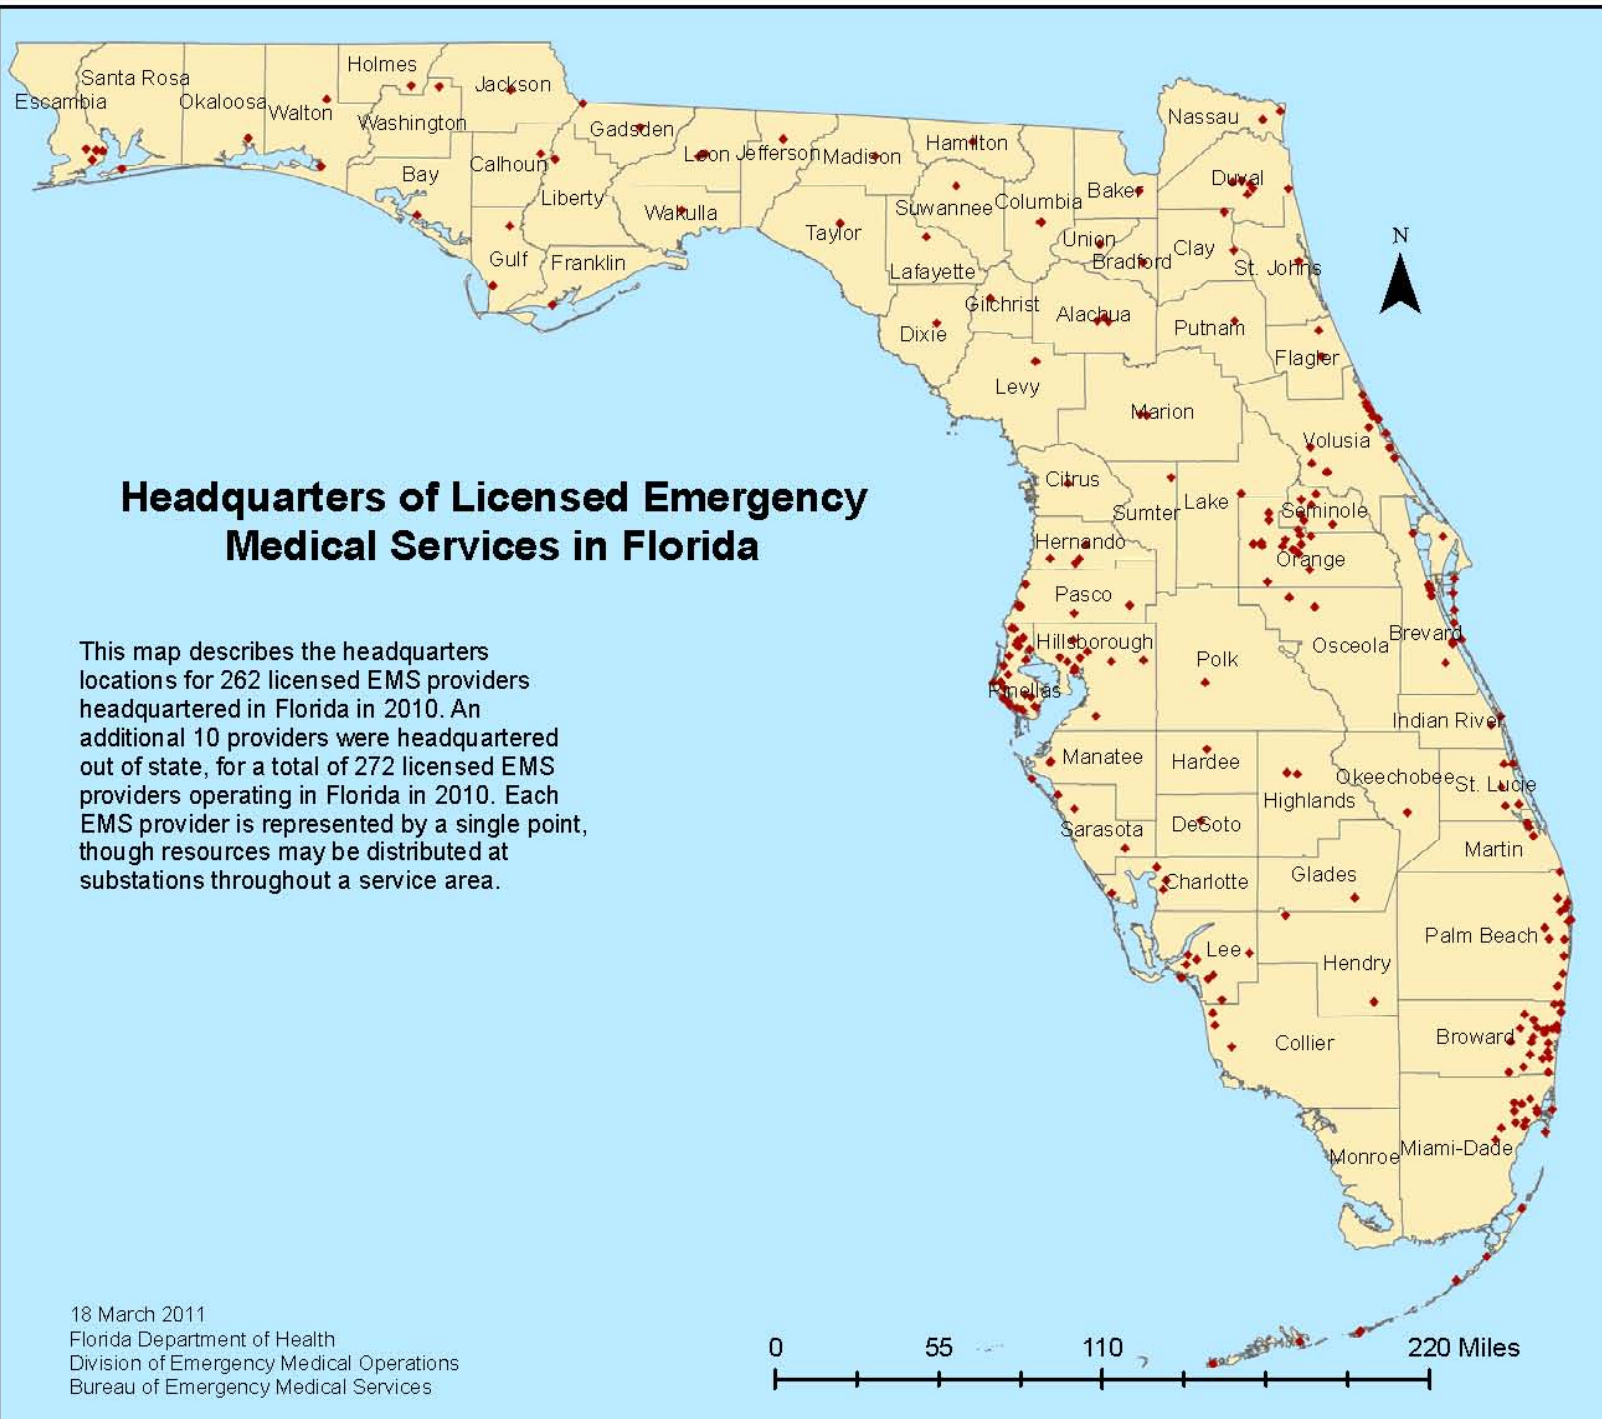

January 1, 2010 to December 31, 2010

## General Information

The term “call volume” can be used in many different ways throughout the state and country. For the purposes of this report, it was determined to separate the term “call volume” into three separate categories. The terms Incident Volume, Patient Contact Volume, and Transport Volume were elected to be used with this report. The terms total incidents and total patient contacts are not synonymous. The term total incidents indicate the total number of distinct incidents that are reported by EMS providers. This definition does not include all of the distinct incidents that are considered when multiple agencies respond to the same incident. Total patient contacts indicate the total number of patients that are responded to by each licensed EMS provider.

## Three Year Incident Count

## Headquarters of Licensed Emergency Medical Services in Florida

This map describes the headquarters locations for 262 licensed EMS providers headquartered in Florida in 2010. An additional 10 providers were headquartered out of state, for a total of 272 licensed EMS providers operating in Florida in 2010. Each EMS provider is represented by a single point, though resources may be distributed at substations throughout a service area.

## Organizational Type by EMS Transport Type

The following table describes organizational types for the 271 licensed EMS providers in 2010, including 10 providers licensed out-of-state. Fire-based EMS providers make up over half of the EMS providers in Florida, with non-hospital private EMS providers being the second most numerous organizational type. Thirty-seven percent (37%) of non-hospital private providers are air providers. Fire-based EMS providers make up almost all the Advanced Life Support Non-Transport (ALS/N) type of EMS in the state.

## EMS Type by Region

The following table describes EMS provider types by Florida region. It excludes 10 providers based out-of-state. Two-thirds of the providers are Advanced Life Support Transport providers, with ALS Non-Transport providers making up a majority of the remainder. Regions 5 and 7 together have almost half of the total number of EMS agencies.

## Organizational Type by Region

The following table describes EMS organizational types by Florida region. It excludes 10 providers based out-of state. Fire-based EMS providers are a lower percentage in Regions 1 and 2, making up less than a quarter of the total for those perspective regions. These two regions have more Governmental, Non-Fire EMS and Hospital organizational types, by percentage. In all other regions, the reverse is true; there are more fire-based EMS providers than governmental non-fire EMS providers.

## Permitted Vehicles by Region

Table IV describes permitted vehicles by Florida region. It excludes 10 providers based out-of-state. The 10 out-of-state providers have 46 air EMS vehicles and 5 ground EMS vehicles. One out-of-state EMS provider with 18 EMS aircraft is licensed in Georgia and operates in Florida's Region 1.

Region 7 has the most EMS vehicles of both air and ground, followed by region 5; this is mostly consistent with their call volume, described below.

	Ground	Air	All	% of Total
Region 1	172	4	176	4.3%

## Call Volume by Organizational Type

The following three tables describe call volumes by organizational type for 271 EMS agencies, including 10 agencies licensed out-of-state.

When call volume is described by incident, patient encounter, or transport; the percentage of service provided by each organizational type is consistent, except for transport. When transports are described, call volume for fire-based EMS agencies falls by about 10%, with the 10% moving to private, non-hospital EMS agencies.

# Call Volume by Region

The following tables describe incident volume, patient encounter volume and transport volume by region. It excludes 10 providers based out-of-state. Seven of the 10 providers based out of state are air transport providers, with no ground vehicles.

Regions 5 and 7 have the most licensed EMS agencies per region; Regions 1 and 2 have the fewest, with 16 each. Call volume, by each of the three measures shown below, is higher in Region 7.

### Reported EMS Incidents by Florida County, 2010

Data is self-reported aggregate totals for 2010 submitted by emergency medical services headquartered in Florida. A total of 3997 incidents in 2010 were reported by 7 EMS agencies with headquarters outside of Florida.

Some EMS agencies cover multiple-county response areas. For this map, incidents are credited to the county that contains the incident-reporting EMS agency headquarters, which is not necessarily the county where the incident occurred. This results in some misclassification of transport events by county. The department notes that this kind of misclassification is evident in the area of Lake and Sumter Counties.
