LETTER TO COMMUNITY

The Florida Department of Health in Walton County (DOH-Walton) and the Walton Community Health Improvement Partnership (WCHIP) believe that all Walton County residents should have the opportunity to make the choices that allow them to live a long, healthy life, regardless of their income, education, ethnic background or abilities. This plan uses the prioritized health issues from the 2019 Community Health Assessment (CHA) for Walton County, Florida and addresses some of the root causes to those issues.

The findings from our 2019 CHA helped identify top health issues facing our community. Through collective input, goals, strategies, and objectives were developed to address these issues in order to reach our vision of a healthy and connected Walton County. The plan will be implemented over the next few years and will be reviewed annually to monitor the progress being made. Based on the top health issues outlined in the 2019 CHA, WCHIP partners chose the four priorities for 2020-2022 Community Health Improvement Plan, which are:

- Healthy Homes
- Healthy Places
- Healthy People
- Healthy Behaviors

We would like to thank our community members and partners for their dedication and participation in the development of this county-wide plan. As a member of the community, we invite you to attend an upcoming WCHIP meeting. To become involved, contact WCHIP at wchip@flhealth.gov or visit walton.floridahealth.gov.

A #HealthyWalton Begins Today!

WALTON COUNTY

EXECUTIVE SUMMARY

The Florida Department of Health in Walton County (DOH-Walton) and the Walton Community Health Improvement Partnership (WCHIP) initiated a new community health improvement process in 2019. Over the past year, local public health system partners joined forces to develop the 2020-2022 Walton County Community Health Improvement Plan (CHIP). A CHIP is a strategic plan to address public health priorities in a community and defines how DOH-Walton and public health system partners will work together to improve the health of Walton County. Critical sectors invited to participate in the development of Walton County's CHIP included local hospitals and health care organizations, local government, community-based organizations, social service organizations, and schools.

Utilizing the National Association of City and County Health Officials (NACCHO) Mobilizing for Action through Planning and Partnerships (MAPP) framework, the planning team engaged in a comprehensive community health assessment (CHA). The findings from the CHA were reviewed, analyzed, and synthesized to inform the development of Walton County's CHIP. Strategic health priorities were identified through a facilitated process that examined crosscutting strategic issues that emerged in the CHA. When establishing health priorities for Walton County's CHIP, feasibility, impact on health outcomes, and the promotion of health equity and the social determinants of health were considered.

Through this process, four strategic priorities were identified for Walton County's CHIP:

- **Healthy Homes:** Healthy homes promote good physical and mental health. Good health depends on having homes that are safe and free from physical hazards. In contrast, poor quality and inadequate housing contributes to health problems such as chronic diseases and injuries, and can have harmful effects on childhood development.
- **Healthy Places:** The built environment includes all of the physical parts of where we live and work (e.g., homes, buildings, streets, open spaces, and infrastructure). The built environment influences a person's level of physical activity. For example, inaccessible or nonexistent sidewalks and bicycle or walking paths contribute to sedentary habits. These habits lead to poor health outcomes such as obesity, cardiovascular disease, diabetes, and some types of cancer.
- **Healthy People:** Disparities in health outcomes exist in specific groups of people. When exploring preventable injuries, chronic diseases, and infectious diseases, specific populations are more at-risk or vulnerable. Defining characteristics of these populations include age, sex, geography, race, ethnicity, or income.
- **Healthy Behaviors:** Behavioral health is essential to a person's overall health and wellbeing, interpersonal relationships, and ability to live a full and productive life. Mental illness can influence the onset, progression, and outcome of other illnesses and often correlates with health risk behaviors such as substance abuse, tobacco use, and physical inactivity.

These priorities guided the development of goals, objectives, and key activities that will be implemented to promote optimal health and well-being for all who live, work, learn, play, and pray in Walton County. The result of the MAPP process is a well-crafted roadmap that we will review and revise annually to meet emerging challenges and opportunities.

STRATEGIC PRIORITIES

STRATEGIC PRIORITY 1

Healthy Homes

GOALS:

- Increase capacity for affordable housing.
- Improve housing stability through supportive services for vulnerable populations, including older adults, people with disabilities, homeless people, and individuals and families at risk of becoming homeless.

STRATEGIC PRIORITY 2

Healthy Places

GOALS:

- Improve the built environment to support healthy lifestyles of individuals across the lifespan.
- Increase collaboration across sectors to reduce barriers to health.

STRATEGIC PRIORITY 3

Healthy People

GOALS:

- Prevent and reduce intentional and unintentional injuries and deaths.
- Prevent the spread of disease through prevention and community education.

STRATEGIC PRIORITY 4

Healthy Behaviors

GOALS:

- Reduce substance use through prevention and community education.
- Increase awareness of mental health and substance use disorder services.
- Reduce illness, disability, and death related to tobacco use.

METHODS & KEY FINDINGS

METHODS

The 2019 Community Health Assessment (CHA) was conducted by the Florida Department of Health in Walton County (DOH-Walton) in support of the Walton Community Health Improvement Partnership (WCHIP). Created in part to guide a community health improvement planning process, WCHIP is an independent collaborative made up of various community members and organizations that serve Walton County.

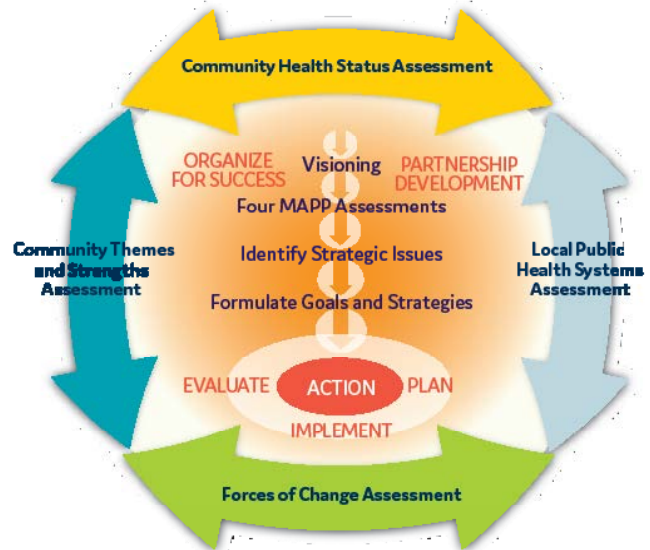

This assessment details the top health issues for Walton County after consideration of all the data collected. To develop the CHA, we used the Mobilizing for Action through Planning and Partnerships (MAPP) model. The MAPP model is made up of four assessments that help identify public health issues in our community

In 2018-2019, DOH-Walton held meetings every month with partner agencies to organize and coordinate the assessment data collection process. Additionally, the DOH-Walton staff reviewed local and state health assessments for methodology and data collection comparisons. Various data profiles from FLHealthCHARTS, Florida Department of Health's Community Health Assessment Resource Tool Set, were used to find relevant data regarding diseases, health behaviors, and social determinants of health. The CHA yielded the top eight health issues for Walton County: substance use, mental health, housing, preventable injuries, healthy food access, education, vaccine-preventable diseases, and poverty.

Through voting, WCHIP partners then decided which of the top health issues to adapt to priorities for the 2020-2022 Community Health Improvement Plan. Partners decided to keep the priorities broad to allow flexibility for potential emerging issues during the plan's time frame.

MAPP

Mobilizing for Action through Planning and Partnerships

A FOCUS ON THE SOCIAL DETERMINANTS OF HEALTH^{1, 2}

Health begins where you live, learn, work, play, and pray. All Walton County residents should have the opportunity to make the choices that allow them to live a long, healthy life, regardless of their income, education, ethnic background or abilities. It is important to work toward raising the bar for all so that everyone can have the opportunity to make healthy choices.

The majority of our health is determined by social, economic and environmental factors. These “social determinants of health” strongly influence health behaviors, access to clinical care, and even our genes and biology. Income, education, housing and transportation create opportunities or barriers to health. This plan address these social determinants of health within each of the priorities.

Policy is a critical tool for changing environments. The goal is to create a systematic approach through informed policy changes by local government, thereby addressing a root cause of health inequities. Needed policy changes for the priorities are featured on pages 19-26.

LOCAL PUBLIC HEALTH SYSTEMS³

Conducted March 20, 2019 – April 17, 2019

AVERAGE ESSENTIAL PUBLIC HEALTH SERVICE SELF-ASSESSMENT

Essential Public Health Service	Score	Rating
Monitor Community Health Status	71%	Significant
Diagnose & Investigate Health Problems	80%	Optimal
Inform, Educate & Empower Public	82%	Optimal
Mobilize Community Partnerships	78%	Optimal
Develop Policies & Plans	71%	Significant
Enforce Laws & Regulations	70%	Significant
Link People to Health Resources	79%	Optimal
Assure Competent Health Workforce	65%	Significant
Evaluate Health Services	67%	Significant
Research Innovative Health Solutions	69%	Significant
Average Overall Score	73%	Significant

Strongest Performance

Inform, Educate, and Empower People About Health Issues This Essential Public Health Service centers around planning and implementing initiatives using health education and communication sciences to build knowledge and shape attitudes, inform decision-making choices, and develop skills and behaviors for healthy living.

Weakest Performance

Assure a Competent Public and Personal Health Care Workforce This Essential Public Health Service centers around assessing the public health and personal health workforce by maintaining public health workforce standards, using public health competencies, providing continuing education and life-long learning opportunities, and facilitating leadership development.

COMMUNITY THEMES & STRENGTHS³

Conducted May 1, 2019 – July 31, 2019

KEY INFORMANT INTERVIEWS **For a listing of all of the Key Informants, please go the 2019 CHA.*

Top Important Issues that Must Be Addressed to Improve Health

1. Affordable and healthy housing
2. Opportunities to live healthy lives (at home, work, and school)
3. Drug and alcohol use
4. Access to medical and behavioral health care
5. Flexible and affordable public transportation
6. Dependable jobs families with livable wages

COMMUNITY SURVEY

Total Number of Respondents: 280

Priority Population Respondents	Response %	Actual %
Less than High School Diploma or Equivalent	2.9%	14.1%
Black or African American	6.1%	5%
Hispanic	5%	6%
Income Less Than \$15,000	13.6%	--
Disabled	4.6%	16.6%
Unemployed	1.8%	3.6%
Over Age of 60	40%	27%

Top Community Issues

Priority Populations	All Respondents
1. Unaffordable and inaccessible housing	1. Unaffordable and inaccessible housing
2. Crime	2. Employment and entrepreneurship opportunities
3. Education	3. Education

Top Unhealthy Behaviors

Priority Populations	All Respondents

2. Text/using phone while driving	2. Text/using phone while driving
3. Being overweight or obese	3. Alcohol use

FORCES OF CHANGE³

Conducted: September 12, 2018

Forces (Trends, Events, Factors)	Opportunities	Threats
Walton County Demographics		
<ul style="list-style-type: none"> Aging population Global travel Steadily increasing new residents Limited affordable housing Improving education system Increasing new businesses and economic development 	<ul style="list-style-type: none"> More focus on addressing issues such as the homeless, poverty, and older adults in the community. Ability to leverage area volunteer programs to increase civic participation in the community. Local government has a focus on bettering economic development opportunities to drive community growth. Increasing focus in the field of public health on minority health and health equity. More focus on addressing issues such as the homeless, poverty, and older adults in the community. 	<ul style="list-style-type: none"> Increasing population and global travel offers more possibility of environmental issues and communicable disease spread Increasing drug use within community with novel types of drugs that healthcare providers might not be educated on. Lack of specific community resources (ie. geriatric dental, urgent care centers, mental health treatment). With the increase in residents and tourists, there is an increased likelihood of individuals potentially coming in contact with bacteria or algal blooms that cause illness (ie. Vibrio, enterococci, red tide, etc.). Lack of affordable housing locally continues to be an increasing problem, which then affects the workforce, the ability to seek and obtain proper healthcare, and transportation. Increasing homeless and aging population Limited control to offer competitive wages to employees. Extreme socioeconomic differences between North and South Walton County.
Walton County Geography		
<ul style="list-style-type: none"> Rural areas with limited transportation Population split between North and South Walton County Coastal Location (hurricanes, tourists, etc.) 	<ul style="list-style-type: none"> Telehealth services are increasing in popularity, which could help with access to care needs. 	<ul style="list-style-type: none"> Lack of specific community resources (ie. geriatric dental, urgent care centers, mental health treatment). Walton County residents are susceptible to potential deadly endemic diseases (ie. rabies, West Nile virus, etc.). Limitations on public transit and control over transportation
Funding		
<ul style="list-style-type: none"> Limited allocated funding for community public health initiatives Changes in Medicaid 	<ul style="list-style-type: none"> Increasing national, state and local focus on substance use and mental health with increased funding for community resources for prevention and intervention. 	<ul style="list-style-type: none"> No control over possible budget changes. Uncontrollable managed Medicaid changes to contract winners. Limited control to offer competitive wages to employees.
Partnerships and Communication		
<ul style="list-style-type: none"> Access to technology Lack of awareness of sexual health issues 	<ul style="list-style-type: none"> Possibility of a formalized network to allow “smooth” transition of services from one agency to another (ie. inmate releases). Increasing participation among community partners and ability to increase interagency communication. Ability to increase local community leaders’ and partners’ awareness of health equity and the social determinants of health. Increasing focus in the field of public health on minority health and health equity. Increasing emphasis on disease prevention and healthy living including diet, exercise and mental health. 	<ul style="list-style-type: none"> Public unawareness of the importance of routine services for males. Decision-makers not always at the table for important public health discussions. Lack of community knowledge, education, communication and media resources within Walton County (i.e. “Walton County is a media black hole”).
Social		
<ul style="list-style-type: none"> Strong faith-based community Growing numbers of “communities” Limited social outlets for children and young adults Segmented generational populations Social media 	<ul style="list-style-type: none"> Increasing community focus on stigmatized public health issues such as mental health, substance use, and HIV lead to opportunities to break stigmas and have conversations. Robust religious community that could be leveraged to build educational awareness for parents, specifically families of different racial or ethnic backgrounds. 	<ul style="list-style-type: none"> Younger generation being less responsible for their actions and the increase in their use of technology to “fix” everything. Teenagers have “nothing to do” because there are limited area entertainment opportunities.

COMMUNITY HEALTH STATUS³

Conducted June 1, 2019 – August 21, 2019; Updated January 31, 2022

OUR DEMOGRAPHICS

Population Growth

According to U.S. News, Walton County is the fifth fastest-growing county in the United States.⁴ From 2017 to 2018, Walton County had a population growth rate of 4.38%.⁵

Population by Race and Ethnicity (2018)⁵

By 2030, the Hispanic population is anticipated to represent almost 12% of Walton County's total population.⁶

Population by Age (2018)⁵

Life Expectancy⁷

Certain populations tend to experience adverse health outcomes or have different health needs based on demographics. Key populations that can be at risk and should be monitored include the following:

Older Adults⁵

Tracking the population of older adults is important because this population has unique health needs, which should be considered separately from other age groups. Walton County's older adults is one of the fastest growing demographics.

1 in 4 residents are over the age of 60.

People Living in Poverty⁸

Living in poverty creates barriers for achieving optimal health. Examples include limited access to health services, healthy food, and other necessities to living a healthy life.

1 in 7 residents are living in poverty.

People with Disabilities⁹

Until recently, people with disabilities have been overlooked in public health surveys, data analyses, and health reports. Emerging data indicate that individuals with disabilities experience health disparities in health behaviors, clinical preventive services, and chronic conditions. Walton County has a higher percentage of individuals with disability status, compared to Florida and the United States.

OUR HEALTH STATUS INDICATORS, 2019

Indicator	Walton County	Florida	Local Trend

Tobacco-Related Cancer Deaths to Persons 35 and Over, Rate Per 100,000, 35 and Over (2020) ⁷	181.2	153.1	▼

PRIORITIZATION

Conducted September 18, 2019

On September 18, 2019, DOH-Walton and WCHIP convened a meeting of approximately 35 community partners. Attendees were educated on the MAPP process, health equity, social determinants of health and the connection between health outcomes. An abbreviated version of the 2019 CHA was presented to the attendees by the WCHIP Steering Committee and other subject matter experts.

CHA pages were reviewed based on the "top health issues" identified by the WCHIP Steering Committee upon review of the MAPP assessments, which included substance use, mental health, housing, preventable injuries, healthy food access, education, vaccine-preventable diseases, and poverty. The social determinants of health and addressing health inequities were featured in aspects of top health issues and heavily considered in the prioritization process of this plan.

Following the review of the CHA and the top health issues, attendees voted to select the final priority areas that would form 2020-2022 Community Health Improvement Plan (CHIP) work groups. Posters were placed around the room, and each of the attendees had two votes, signified by colored stickers, for their first and second choices for priorities. For a CHIP workgroup to be finalized, there had to be at least one community member "lead." Each workgroup was also assigned a DOH-Walton staff member as a facilitator. Leads also serve on the WCHIP Steering Committee to share what their group is working on and the progress that has been made.

Upon completion of voting, attendees then discussed whether or not some of the top health issues were connected or made sense being categorized together into one workgroup. The attendees chose to combined substance use with mental health, preventable injuries with vaccine-preventable diseases, and housing with poverty.

Image Caption: On September 18, 2019, WCHIP partners reviewed the 2019 Community Health Assessment findings to determine the priorities for the 2020-2022 Community Health Improvement Plan.

The following priorities were selected as CHIP workgroups:

Healthy Homes

Healthy Places

Healthy People

Healthy Behaviors

FORMULATING GOALS & STRATEGIES

Conducted November 13, 2019

On November 13, 2019, DOH-Walton and WCHIP convened the 2019 Healthy Walton Summit to formulate goals and strategies for each of the defined priorities. Over 70 community members attended and joined the discussion to guide the 2020-2022 CHIP.

The Healthy Walton Summit's agenda included a presentation to overview the State Health Improvement Plan, a discussion panel, and workgroup breakouts. The discussion panel included representatives from the City of Freeport, Chautauqua Healthcare Services of Lakeview, AARP Florida, Walton County Planning and Development Services, Walton County School District, Walton County Sheriff's Office, City of DeFuniak Springs, and the Walton Community Health Center. The discussion panel was facilitated by a local religious and community leader from Caring and Sharing of South Walton.

During the breakouts, workgroups were tasked with identifying assets (i.e. *What programs/services exist?, Which organizations or groups provide related programs/services?, Are those groups/organizations here today?*) and identifying gaps (i.e. *What should the community be doing to address the priority area?, What programs/services does our community need?, Which organizations should play a role?*)

To conclude the Healthy Walton Summit, WCHIP Steering Committee reviewed the activities and achievements completed from the 2017-2019 CHIP.

With the publication of the Community Health Improvement Plan 2020-2022, the chosen CHIP workgroups will continue to meet during the implementation phase of the action plans. Annual evaluation and reports will be published to provide the community with updates on progress toward achieving the goals.

Image Caption: On November 13, 2019, DOH-Walton facilitated community members in formulating goals and strategies for each of the 2020-2022 CHIP priorities at the 2019 Health Walton Summit.

2021 ACCOMPLISHMENTS

Integrating Housing and Health

Activities of the Healthy Homes Workgroup are included in the National Association of Counties' new report on Addressing Housing to Improve Health Outcomes. Walton County is an example of how counties can align housing goals with health goals to create healthy, affordable neighborhoods that improve outcomes and quality of life for all residents. This report serves as a best practice and demonstrates the importance of including health outcomes into local housing policy and planning.

Sharing Best Practices with Age-Friendly Walton

On September 9, 2021, WCHIP presented the Age-Friendly Florida initiative to AARP Florida via webinar. The presentation focused on designing the 2020-2022 Community Health Improvement Plan to address the needs of older adults. These activities were lead by the local public health system to align with other community priorities. The initiative was also presented nationwide to the Network of Age-Friendly States and Communities to promote incorporating age-friendly into already existing community plans.

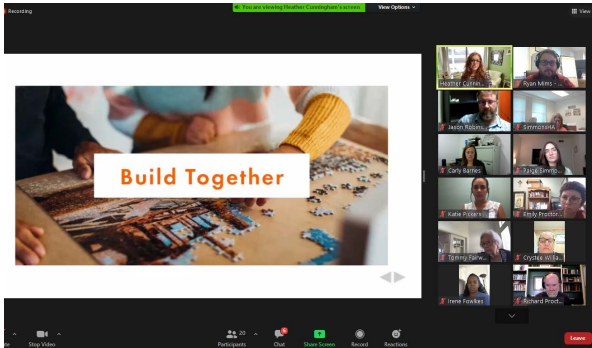

Launching the Art in the Park Project

On April 17, WCHIP partnered with the Walton County Sheriff's Office, Walton County Prevention Coalition, and Cultural Arts Alliance of Walton County and art students from South Walton High School to paint murals at Driftwood Estates Park in Santa Rosa Beach, Florida. Students submitted mural ideas to a panel of members of surrounding Home Owners Associations (HOAs), and the HOAs selected seven murals for the park. The HOAs also provided the muralists with scholarships. This project's goal is to reduce vandalism of parks while making them a more vibrant place that represents the local culture.

Establishing Little Food Pantries to Fight Hunger and Food Insecurity

United Way Emerald Coast (UWEC) was awarded funding through a CARES Act grant for COVID-19 relief to bring ten of these "little food pantries" to Walton County. These stand alone, small, weather-proof pantries draw awareness to food insecurity while creating a space for community members to take what they need and give what they can. UWEC partnered with WCHIP to help find homes for the pantries in areas where they are needed the most.

Simulating the Poverty Experience Virtually

On May 18, 2021, WCHIP joined community members in the Virtual Cost of Poverty Experience (VCOPE) facilitated by Think Tank, Inc. VCOPE engaged attendees by letting them take a “walk in the shoes” of someone that is living with restraints with income and resources by making choices that have both benefits and consequences. The training was provided by Caring and Sharing of South Walton and the Communities of Transformation (COT) Program.

Celebrating Multigenerational Parks

WCHIP’s Healthy Walton Parks has designated four local parks as being “multigenerational parks.” A multigenerational park is one that is designed for all ages and abilities. Multigenerational parks offer opportunities for all park users to increase physical activity with multiple activities of varying intensities. The four parks receiving the designation include:

- Freeport Regional Sports Complex
- J.C. Alford Park in the Gaskin Community
- Padgett Park in Santa Rosa Beach
- Wee Care Park in DeFuniak Springs

Taking Back Unused Prescription Drugs

WCHIP collaborated with the Walton County Prevention Coalition to host collections for the National Drug Take Back Day in both April and October. In total, 255 lbs of unused or expired medications was collected for safe disposal, in partnership with the Walton County Sheriff’s Office and the DeFuniak Springs Police Department.

Highlighting Fall Prevention for Older Adults

On September 29, 2021, WCHIP partnered with Walton County Emergency Management to discuss healthy aging and provide preparedness tips for older adults. West Florida Area Health Education Center also provided a Tai Chi demonstration and highlighted ways to prevent falls. WCHIP also distributed healthy aging packets to local businesses, pharmacies, and health care providers with ideas on how to support older adults and fall prevention in the community.

OUR PRIORITIES

PRIORITY 1: HEALTHY HOMES

Workgroup Leads

Dianne McManus, Homelessness and Housing Alliance
Denise Song, Habitat for Humanity of Walton County

Workgroup Facilitator

Holly Holt, Florida Department of Health in Walton County

Workgroup Members

Dianne McManus, Homelessness and Housing Alliance
Denise Song, Habitat for Humanity of Walton County
Holly Holt, Florida Department of Health in Walton County
Dede Hinote, Walton County Board of County Commissioners
Mac Carpenter, Walton County Planning Development Services
Kelly Schultz, City of DeFuniak Springs
Chris Strawn, City of DeFuniak Springs
Emily Proctor, Caring and Sharing of South Walton
Tom Baker, Walton County Housing Agency
Leslie Spencer, AARP Florida
Janet Brack, Walton County School District
Candy Nowling, Matrix Community Outreach Center

Workgroup Focuses

- Affordable and safe housing
- Homelessness
- Housing instability
- Poverty
- Coordination of community services
- Employment

Community Assets and Resources

- State Housing Initiatives Partnership (SHIP)

- Walton County Affordable Housing Advisory Committee

Housing and Health²⁰

There is strong evidence determining housing's relationship to health. A number of environmental factors within homes are correlated with poor health. Substandard housing conditions such as water leaks, poor ventilation, dirty carpets, and pest infestation have been associated with poor health outcomes, most notably those related to asthma. Additionally, exposure to high or low temperatures is correlated with adverse health events, including cardiovascular events—particularly among the elderly.

People who are not chronically homeless but face housing instability (in the form of moving frequently, falling behind on rent, or couch surfing) are more likely to experience poor health in comparison to their stably housed peers. Residential instability is associated with health problems among youth, including increased risks of teen pregnancy, early drug use, and depression.

Housing the homeless has consistently been shown to improve health outcomes. In one of several randomized controlled trials of interventions to address homelessness, long-term housing subsidies had positive impacts on measures of psychological distress and intimate partner violence. Particularly among chronically homeless people, having a safe place to stay can both improve health and decrease health care costs.

GOAL 1.1: INCREASE CAPACITY FOR AFFORDABLE HOUSING

Strategy 1.1.1: Assist local government with planning and development of affordable housing through policy and systems changes.

Objective 1.1.1A: By June 30, 2020, inventory and evaluate existing properties with land use designations that address affordable housing. **(COMPLETED)**

Owner: Mac Carpenter, Walton County Planning Development Services

Objective 1.1.1B: By December 31, 2022, inventory existing county properties which could be surplus and available for affordable housing sites.

Owner: Mac Carpenter, Walton County Planning Development Services

Objective 1.1.1C: By December 31, 2022, create an overlay district showing mixed-use areas for economic development and affordable housing.

Owner: Mac Carpenter, Walton County Planning Development Services

Objective 1.1.1D: By December 31, 2022, develop a mobility plan to support residents with alternative transit operations to get to jobs or community assets.

Owner: Mac Carpenter, Walton County Planning Development Services

Strategy 1.1.2: Promote affordable housing development among real estate developers and home builders.

Objective 1.1.2A: By December 31, 2020, host a lunch-and-learn for area developers to discuss incentives for affordable housing. **(COMPLETED)**

Owner: Dianne McManus, Homelessness and Housing Alliance

GOAL 1.2: IMPROVE HOUSING STABILITY THROUGH SUPPORTIVE SERVICES FOR VULNERABLE POPULATIONS, INCLUDING OLDER ADULTS, PEOPLE WITH DISABILITIES, HOMELESS PEOPLE, AND INDIVIDUALS AND FAMILIES AT RISK OF BECOMING HOMELESS

Strategy 1.2.1: Enhance systems and programs to coordinate community resources effectively.

Objective 1.2.1A: By December 31, 2022, establish a partnership within north Walton County to administer the Communities of Transformation program to help move families away from instability, isolation, and dependence, and toward self-sufficiency.

Owner: Emily Proctor, Caring and Sharing of South Walton

Objective 1.2.1B: By December 31, 2022, educate ten local social services agencies on the Homeless Management Information System.

Owner: Dianne McManus, Homelessness and Housing Alliance

Objective 1.2.1C: By June 30, 2021, research and determine feasibility of a triage center for resource coordination among local social service agencies. **(COMPLETED)**

- Built environment
- Age-friendly communities
- Healthy food access
- Removing barriers to health
- Faith-based partnerships
- Worksite wellness

Community Assets and Resources

- Healthy Walton Worksites
- Walton County Prevention Coalition's Not in My Lot Program
- Farmers' Markets and the Farmers' Market Nutrition Program for WIC clients and older adults.
- School-based programs:
 - Summer Food Service Programs/Summer BreakSpot by Feeding the Gulf Coast
 - Backpack Program-Food for Thought
- Healthy eating and physical activity programs
- Grocery store tours with Sacred Heart Hospital on the Emerald Coast
- Area food pantries
- OTHERS of Northwest Florida
- IMPACT 100 of Northwest Florida
- Local grocery stores donations
- Peanut butter challenge

Building on Success:

Age-Friendly Walton Initiative

In May 2019, Walton County was the first community in the Florida Panhandle to enter into the AARP Network of Age-Friendly States and Communities. DOH-Walton is facilitating the collaboration of local government and WCHIP to ensure that the issues affecting older adults and individuals with disabilities are addressed strategically.

Healthy Walton Worksites

In January 2019, WCHIP launched the Healthy Walton Worksites initiative that recognizes employers making efforts to positively affect the health and well-being of their employees, their families and their community by implementing comprehensive worksite wellness strategies. Healthy Walton Worksites gives employers the resources and tools needed to foster health as part of the culture of the work environment. In 2019, four local employers received designation as a Healthy Walton Worksite.

GOAL 2.1: IMPROVE THE BUILT ENVIRONMENT TO SUPPORT HEALTHY LIFESTYLES OF INDIVIDUALS ACROSS THE LIFESPAN

Strategy 2.1.1: Identify practical improvements, new interventions, and health promotion enhancements to the built environment.

Objective 2.1.1A: By December 31, 2022, recognize local parks that meet the Healthy Walton Parks criteria.

Owner: Jill Breslawski, UF/IFAS Extension Office

Objective 2.1.1B: Annually, attend at least 75% of the scheduled Community Traffic Safety Team meetings to support local governments in traffic enhancement.

Owner: Ryan Mims, Florida Department of Health in Walton County

GOAL 2.2: INCREASE COLLABORATION ACROSS SECTORS TO REDUCE BARRIERS TO HEALTH

Strategy 2.2.1: Engage new partners to promote healthy places to live, learn, work, play and pray.

Objective 2.2.1A: By December 31, 2022, recognize three local faith-based institutions that meet the Healthy Walton Faith criteria.

Owner: Judea Kring, Walton County Prevention Coalition

Objective 2.2.1B: By December 31, 2022, recognize ten local employers using the Healthy Walton Worksites criteria.

Owner: Jennifer Jordan, Florida Department of Health in Walton County

Objective 2.2.1C: By December 31, 2022, establish or enhance three partnerships that are addressing food insecurity in areas that have limited food access.

Owner: Jill Breslawski, UF/IFAS Extension Office

Objective 2.2.1D: By December 31, 2022, assist three city municipalities to apply for membership in the AARP Network of Age-Friendly States and Communities.

- HIV/AIDS
- Infant mortality
- Infectious diseases
- Vaccine hesitancy

Community Assets and Resources

- Senior fall prevention programs through home health/hospice agencies
- Tai Chi with AHEC
- New texting and driving law, school education programs
- Ongoing flu prevention activities seasonally
- Healthy Babies initiative
- Tobacco prevention (SWAT, Walton County Prevention Coalition, and AHEC)
- Walton County Sheriff's Office Teen Driving Program
- OASIS Florida with HIV prevention
- Car seat safety classes (Healthy Start, UF/IFAS)
- AARP CarFit Program

Making Sure All People Have the Choice to be Healthy¹

Healthy choices should be convenient choices for everyone in Walton County. Health equity is attainment of the highest level of health for all people. Achieving health equity requires valuing everyone equally with focused and ongoing societal efforts to address avoidable inequalities, historical and contemporary injustices, and the elimination of health and health care disparities. This is different from equality which applies a “one-size-fits-all” approach to bettering health.

GOAL 3.1: PREVENT AND REDUCE UNINTENTIONAL INJURIES AND DEATHS

Strategy 3.1.1: Establish and coordinate injury prevention campaigns to reduce disparities in at-risk populations.

Objective 3.1.1A: By December 31, 2022, implement one new community strategy to reduce unintentional injuries and deaths due to motor vehicle accidents. **Owner:** Kristil Knox, West Florida Area Health Education Center

Objective 3.1.1B: By December 31, 2022, develop a fall prevention campaign based on local best practices of healthcare agencies and organizations. **Owner:** Kay Brady, Retired Professional

Objective 3.1.1C: By December 31, 2022, develop a county-wide social marketing campaign to provide education on preventative strategies to reduce infant mortality. **Owner:** Ardelle Bush, Healthy Start of Okaloosa and Walton Counties

GOAL 3.2: REDUCE THE SPREAD OF DISEASES THROUGH PREVENTION AND COMMUNITY EDUCATION

Strategy 3.2.1: Enhance community partnerships to identify, prevent, and reduce the spread of diseases and disparities in at-risk populations.

Objective 3.2.1A: By December 31, 2022, partner with at least two community organizations in developing and implementing a campaign addressing vaccine hesitancy. **Owner:** Doris Bontrager, Florida Department of Health in Walton County

Objective 3.2.1B: By December 31, 2022, partner with at least three community organizations in coordinating prevention efforts for infectious diseases. **Owner:** Doris Bontrager, Florida Department of Health in Walton County

GOAL 3.3: IMPROVE EARLY CHILDHOOD LITERACY

Strategy 3.2.1: Enhance community partnerships to identify, prevent, and reduce the spread of diseases and disparities in at-risk populations.

Objective 3.2.1A: By September 30, 2022, distribute 1,000 books to over 350 households with children residing Walton County. **Owner:** Christy Craig, Florida Department of Health in Walton County

- Mental health
- Substance use
- Access to behavioral health services
- Tobacco use

Community Assets and Resources

- Substance use treatment in the county jail
- Opioid Abuse Resilience Support (OARS) support group
- NARCAN Community Program
- Community opioid training.
- Tobacco prevention in community (smoke-free worksites, SWAT, etc.)
- Local tobacco cessation classes
- Opening home at Santa Rosa Beach for addiction and sex trafficking
- Free prescription program for Medication-Assisted Treatment (MAT)
- PanCare expanding mental health services in Freeport
- Addiction resource list.
- Healthy Start Family Resource Directory
- Local peer support group for mental health diagnosis

Building on Success:

Addiction & Mental Health Resource List

In March 2019, WCHIP created a document that includes all the local and regional resources related to mental health and substance use services available. The document was shared throughout the community through the "Addiction: A Community Concern" presentations. The document was also shared by WCHIP partners at local community service organizations, via social media, and on websites. The document is reviewed and updated annually.

GOAL 4.1: REDUCE SUBSTANCE USE THROUGH PREVENTION AND COMMUNITY EDUCATION

Strategy 4.1.1: Enhance community partnerships to identify, prevent, and reduce the substance use and disparities in at-risk populations.

Objective 4.1.1A: By December 31, 2022, increase the number of locations that the public can dispose of unused prescription drugs from zero (0) to three (3) locations.

Owner: Bryan Callahan, Walton County Prevention Coalition

Objective 4.1.1B: By December 31, 2022, assist a healthcare sector partner in developing a patient education program on prescription drug safety and disposal.

Owner: Wyndy Crozier, Emerald Coast Technical College

Objective 4.1.1C: By December 31, 2022, provide three community trainings in overdose education and naloxone administration to reduce opioid overdose deaths.

Owner: Bryan Callahan, Walton County Prevention Coalition

Objective 4.1.1D: By December 31, 2020, establish a behavior, mental, and spiritual care response team and policy for Walton County Emergency Management.

Owner: Emily Proctor, Caring and Sharing of South Walton

GOAL 4.2: INCREASE AWARENESS OF MENTAL HEALTH AND SUBSTANCE USE DISORDER SERVICES

Strategy 4.2.1: Disseminate and share local resources to improve access to care.

Objective 4.2.1A: Annually, revise the services listed on the Mental Health and Addiction Resource List.

Owner: Tracy Leitner, Florida Department of Health in Walton County

Objective 4.2.1B: By June 30, 2021, coordinate a community meeting with the school district that addresses the mental health services provided in schools.

Owner: Wyndy Crozier, Emerald Coast Technical College

GOAL 4.3: REDUCE ILLNESS, DISABILITY, AND DEATH RELATED TO TOBACCO USE

Strategy 4.3.1: Promote local tobacco cessation programs in community.

Objective 4.3.1A: By June 20, 2022, increase the number of healthcare referrals to tobacco cessation classes by 25%, from 44 (2018-2019) to 55 (2021-2022).

APPENDICES

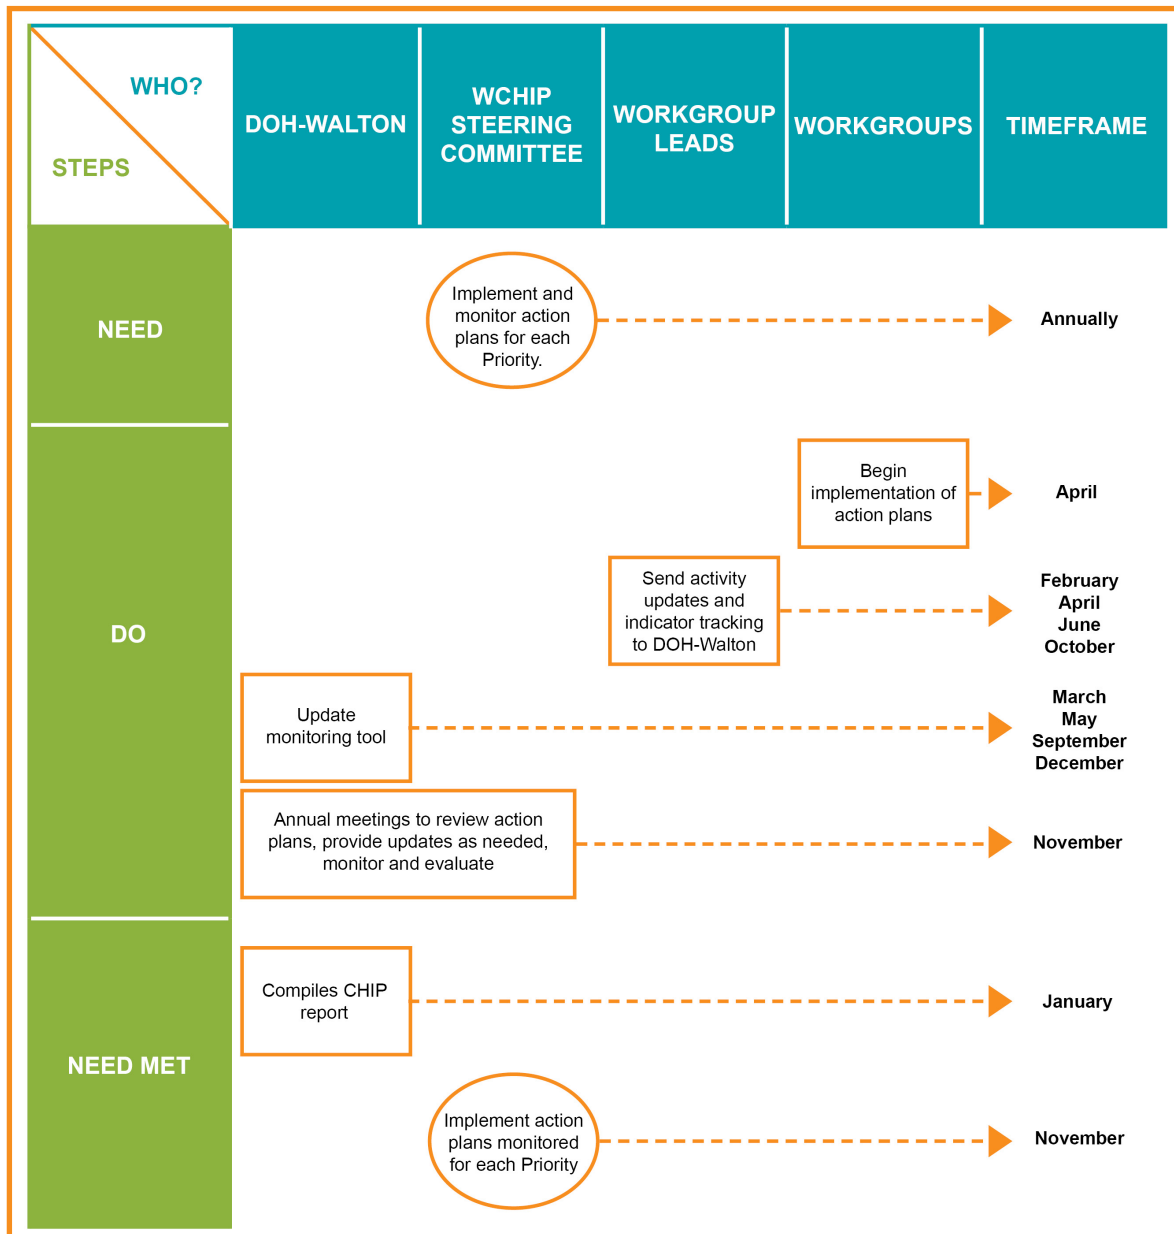

APPENDIX 1: MONITORING PLAN

To hold DOH-Walton staff and WCHIP partners accountable, the action plans will be monitored on a quarterly basis at scheduled WCHIP Steering Committee meetings. Workgroup leads and facilitators will work together to make sure action plans are up-to-date and include all vital information for tracking progress. This monitoring tool will reflect the status of each action step within each action plan, and will track progress on the process and outcome indicators.

Additionally, the WCHIP Steering Committee will host an annual review meeting each November to review the progress made on the action plans and to make amendments as needed. The WCHIP Steering Committee will update the CHIP annually based on the feedback from the annual review meeting. The internal DOH-Walton Performance Management Council will monitor progress of the CHIP action plans quarterly. Figure 1.1 provides an illustration of the CHIP implementation and monitoring process for the 3 year cycle (1/1/2020 – 12/31/2022). An example monitoring tool is included on the next page.
