## Executive Summary

---

The Washington Community Health Improvement Partnership (WCHIP) has worked together to better understand current and future health needs of the Washington County community since 2013. The WCHIP, developed this Community Health Improvement Plan (CHIP) as part of ongoing efforts to improve health in Washington County.

The Florida Department of Health in Washington County (DOH-Washington), in partnership with multiple agencies championed a community health assessment (CHA) to identify and prioritize health issues in Washington County, using a nationally recognized approach called Mobilizing for Action through Planning and Partnerships (MAPP). The CHA uses quantitative (e.g., disease incidence rates and mortality rates) and qualitative data (e.g., community input) to assess the health status of the community and determine which health issues will be the focus on health planning efforts for the next three to five years.

The WCHIP decided the CHIP would focus on the following priority health issues after reviewing and discussing the data collected via the CHA:

- **Communication** (Resources, Dissemination, Keeping Public Informed)
- **Mental Health** (Availability and Resources)
- **Substance Abuse** (Drug Use)
- **Health** (Obesity and Chronic Diseases)

The purpose of the community health improvement planning process is to create goals, objectives, and strategies targeting the priority health issues identified in the CHA. To improve implementation and evaluation of the goals in this plan, the WCHIP decided to utilize a balanced scorecard approach, which identifies goals, objectives, and strategies and sets measurable targets to move the community health improvement process forward.

The targets and measures outlined in the CHIP Action Plans at the end of this document were carefully selected through collaborative and inclusive workgroups for each health issue. Additionally, many of the targets align with the national Healthy People 2020 initiative and with goals and objectives from the Florida State Health Improvement Plan. These national and statewide initiatives provide evidence-based benchmarks to track and monitor health, as well as best practices to guide health promotion and disease prevention efforts, which will ultimately help improve health outcomes in Washington County.

During the next steps of the MAPP health planning cycle, the WCHIP will continue to work together to address the four priority health issues outlined above. The WCHIP will plan for action, implement strategies, and evaluate progress. As a living document, the 2019 Washington County Community Health Improvement Plan is flexible and can accommodate changes or updates as needed. The WCHIP will re-assess and update annually to best address the needs of the local community.

As a member of the community, we welcome your feedback and collaboration to achieve the goals established in Washington County's CHIP. To become involved, contact the Florida Department of Health in Washington County at [Traci.Corbin@flhealth.gov](mailto:Traci.Corbin@flhealth.gov).

## **Acknowledgements**

---

With valuable input from Washington County's community stakeholders and leaders, the 2019 Washington County CHIP became a decisive community call to action. The Florida Department of Health in Washington (DOH-Washington) would like to extend gratitude to the organizations and individuals that dedicated their valuable time to make sure that the CHIP goals, objectives, and strategies aligned best with the needs of the local community. DOH-Washington would also like to thank the organizations involved with implementing the CHIP action plan; through cooperation and leadership, Washington County will make strides towards its desired health outcomes.

## **MAPP Process Overview**

---

The Florida Department of Health in Washington County (DOH-Washington) maintains strong, enduring relationships with multiple health and social services providers throughout the community. DOH Washington invited the ongoing WCHIP to act as a platform and steering committee for the Washington County Community Health Assessment (CHA) process, which began in July 2018.

Community health assessments intend to answer questions about community health status and needs, including: "How healthy are our community residents?" and "What does the health status of our community look like?" An underlying goal of the Washington County community health

assessment was to ensure a truly community-driven process by empowering community members, organizations, and stakeholders to help facilitate change through collaboration, coordination, and communication.

## The MAPP Process

DOH-Washington in partnership with multiple community agencies completed the CHA using the Mobilizing for Action through Planning and Partnerships (MAPP) process, developed by the National Association of County and City Health Officials (NACCHO) and the Centers for Disease Control (CDC). The MAPP process is a community driven, participatory process intended to bring together not only health care providers, but also mental health and social service agencies, public safety agencies, education and youth development organizations, recreation agencies, local governments, neighborhood associations, and civic groups to improve community health. By participating in the MAPP process, community stakeholders gain a higher understanding and awareness of their community and local health issues.

## MAPP Assessments

The MAPP process consists of four major assessments:

1. The **Forces of Change Assessment** identifies forces such as legislation, technology, and other impending changes that affect the context in which the community and its public health system operate.
2. The **Local Public Health Assessment** which focuses on all of the organizations and entities that contribute to the public's health. The LPHSA answers the questions, "What are the components, activities, competencies, and capacities of our local public health system?"
3. The **Community Themes and Strengths Assessment** provides an understanding of the health issues that residents feel are important, including quality of life.
4. The **Community Health Status Assessment** identifies priority community health and quality of life issues. Questions answered here include, "How healthy are our residents?" and "What does the health status of our community look like?"

Detailed information on all of the MAPP assessments can be found in the 2019 Washington County Community Health Assessment, which is available on the Florida Department of Health in Washington County's website at <http://washington.floridahealth.gov/>.

## Summary of Findings from Four MAPP Assessments

<p style="text-align: center;"><b>Community Health Status</b></p> <p>Unhealthy behaviors are a significant contributor to poor health status in Washington County, including:</p> <ul style="list-style-type: none"> <li>o Substance abuse</li> <li>o Excess weight/obesity</li> <li>o Poor eating habits/nutrition</li> <li>o Tobacco use</li> <li>o Sedentary lifestyle/lack of exercise</li> <li>o Not seeing doctor/dentist</li> </ul>	<p style="text-align: center;"><b>Community Themes &amp; Strengths</b></p> <p><b>Focus Groups:</b></p> <p>Recurring themes include:</p> <ul style="list-style-type: none"> <li>• Need for better communication to the public and within agencies</li> <li>• Need for public transportation</li> <li>• Lack of awareness of health services available</li> <li>• Lack of recreational/cultural activities</li> <li>• Lack of mental health service availability within the county</li> <li>• Lack of specialists</li> </ul> <p>The following were identified as strengths:</p> <ul style="list-style-type: none"> <li>• Community pulls together in times of need</li> <li>• Schools play a positive roll in the county</li> <li>• Strong faith-based community</li> </ul> <p><b>Community Survey:</b></p> <ul style="list-style-type: none"> <li>• Top 5 health problems to address:             <ul style="list-style-type: none"> <li>o High blood pressure</li> <li>o Obesity</li> <li>o Diabetes</li> <li>o Cancer</li> <li>o Heart Disease/Stroke</li> </ul> </li> <li>• Access &amp; availability problems:             <ul style="list-style-type: none"> <li>o Mental health services for adults, young children &amp; teens</li> <li>o Substance abuse services</li> <li>o Specialty care services</li> <li>o Pediatric services</li> </ul> </li> <li>• Other issues that are important to address:             <ul style="list-style-type: none"> <li>o Addiction- alcohol or drug</li> <li>o Child abuse/neglect</li> <li>o Domestic violence</li> <li>o Suicide</li> <li>o Mental health</li> </ul> </li> <li>• Top 5 behaviors of most concern:             <ul style="list-style-type: none"> <li>o Drug abuse</li> <li>o Overweight/obesity</li> <li>o Alcohol abuse</li> <li>o Lack of exercise/poor eating habits</li> <li>o Racism</li> </ul> </li> </ul>

## Identifying Priority Health Issues

To select health priorities, the WCHIP reviewed key findings from the four MAPP assessments at a meeting on April 23, 2019. The WCHIP discussed quantitative data (e.g., disease mortality rates, health behaviors, factors in the physical environment, quality of life indicators) and the top health issues identified through focus groups and community surveys. Then, attendees provided feedback through a voting system that allowed them to answer the question: “Of all the issues discussed today, which three to five issues do you think are the most important?”

The meeting attendees voted for the following priority issues to be addressed and targeted for improvement in the CHIP:

- **Communication** (Resources, Dissemination, Keeping Public Informed)
- **Mental Health** (Availability and Resources)
- **Substance Abuse** (Drug Use)
- **Health** (Obesity and Chronic Diseases)

## Overview of CHIP Process

Phases 1-4 of the Mobilizing for Action through Planning and Partnerships (MAPP) process involve visioning, collecting and analyzing data, and gathering community input in order to determine which health issues will become the strategic focus of health planning in the community for the next three to five years. A CHIP is formulated primarily in **Phases 5) Goals & Strategies** and **6) Action Cycle** of the MAPP process. In Phase 5, the community formulates broad goal statements addressing the previously identified health issues, as well as more specific strategies related to each goal. Phase 6 involves planning, implementation, and evaluation. During Phase 6, the community creates an action plan which provides details on how goals and strategies will be achieved.

The members of WCHIP held four workgroups in the month of May: one for each of the priority areas identified. Each workgroup had a leader that began the meetings with a summary of the findings of the community health assessment and a recap of the health issue(s) to be addressed in each workgroup. Next, the leader facilitated a brief discussion of goals, objectives, and strategies in order to create draft action plans to present at the next larger WCHIP meeting in June. At the June 3, 2019 larger WCHIP meeting the draft action plans were shared and

additional brainstorming was completed in order to identify potential resources, lead persons/organizations, measures for tracking progress of a strategy, current performance levels, and targets for each strategy. The detailed CHIP Action Plans are included at the end of this document.

Appendix A: Action Plans

Appendix B: Minutes from April and June WCHIP meetings

Appendix C: Sign-in sheets from April and June WCHIP meetings

# Appendix A:

## CHIP Action Plans

For the objectives below, community partners (CHIP group) meet quarterly. During the quarterly meetings, partners decided what objective or objectives they would like to work on. From there, partners are assigned roles and then report on their role at the following meeting. This process works well for community partners and for the group. Every November, the annual review takes place where the CHIP group discusses progress, finalizes objectives, and reviews updated data. There had been no annual review in 2020 due to COVID-19 but the group has begun virtual meetings to ensure the CHIP remains in progress. Partners are held accountable by group leaders and in quarterly meetings when updates are provided.

For each of the objectives below, various factors such as education, employment, income, family and social support, and community safety was reviewed during the creation of the CHIP and through as needed for the various objectives. One example of this was when the group looked at obesity and chronic disease rates and noted that the availability of physical activity resources was lower than other counties in the State with greater access to physical activity resources. Another example was when the CHIP group began the discussion about mental health and available resources. It was noted that Washington County has limited resources for uninsured individuals and mental health support and even for those with insurance, local resources where travel was not required was limited. Transportation was noted as a barrier for mental health services. Overall, social determines and health and health equity were the driving force behind why localized objectives were selected as priority areas.

Policy changes needed for the objective below include billable contracts for National Diabetes Prevention Program classes to make the program more sustainable. This policy was completed in February 2020 when Florida Department of Health in Washington County entered into contract with Solera. In addition, policy and environmental changes need to take place for Washington County to have more physical activity resources. This has been discussed in the past at the community level and in the CHIP meetings however, funding and maintenance seem to be the barrier. Transportation or integration of transportation services is a community barrier in regard to mental health services along with healthcare service. This again is a recurrent theme in community meetings and CHIP meetings. Overall, policy changes that impact the health of a community are complex and often underfunded. Policy change is something the Washington Community Health Improvement Partnership (WCHIP) continues to review and continues to work on in promotion of a healthier future for Washington County.

## WASHINGTON COMMUNITY HEALTH IMPROVEMENT Plan (CHIP) 2019-2024

**SMART Objective:** Decrease the percentage of adults who are overweight or obese from 72.7% (Washington 2016) to 70.5% (Washington) by December 31, 2024. **Date:** May 10 ,2019  
**Data Source:** FL CHARTS  
WCHIP - Quarterly

**PRIORITY ISSUE AREA:** Obesity and Diabetes Reduction

<b>Group Members:</b> Traci Corbin, Valery Lawton, Catherine Wynn, Rachael Conrad, and Shanta Sapp	<b>Facilitator:</b>	Traci Corbin
	<b>Recorder:</b>	Valery Lawton

**PRIORITY GOAL:**(Desired outcome) Reduce substance abuse in Washington County so that adults, children, and families are healthy participants living in their communities.

**STRATEGY:**(How to get desired outcome) Create a substance abuse resource guide

Major Milestone Activities/Action Steps <i>(What will be done?)</i>	Responsible Person <i>(Who will do it?)</i>	Completion Date <i>(When? Month/Yr.)</i>	Status <i>(Not started; on schedule; at risk; not on schedule; complete)</i>	Progress Comments <i>(Describe progress; barriers; successes)</i>
1)Research available substance abuse resources in Washington and Holmes County(name, address, phone number, services offered, insurance, and cost)	Valery Lawton, Rachael Conrad, Traci Corbin, and Shelia Paul	11/30/19		
2)Compile all resources in one page document	Group and Shelia Paul	01/31/20		
3)Send to WCHIP and HHTF members and ask them to post on their social media	Traci Corbin	03/01/20		
4>Contact the newspaper to see if they would publish resource guide	Rachael Conrad	03/01/20		
5)Ask community partners to distribute at meetings and at community events	Group	03/01/20		
6)Update resource guide yearly	Group	Yearly		
7)Create substance abuse profile to hand out at events with resource guide	Group and Shelia Paul	03/01/20		

**How will you measure improvement?**  
Creation of a resource guide

**How will you continue to monitor the process?**  
Annual review of data

SMART = Specific, Measurable, Achievable, Relevant & Timely

## WASHINGTON COMMUNITY HEALTH IMPROVEMENT Plan (CHIP) 2019-2024

**SMART Objective:** Decrease the percentage of adults who report having poor mental health on 14 or more of the past 30 days, overall from (2017) 14.6% to 11.6% by June 30, 2024. **Date: May 20, 2019**  
 WCHIP - Quarterly  

**PRIORITY ISSUE AREA:** Mental Health

<b>Group Members:</b>	Allison Blevins, Kimberly Register, Sharon Jones, kisha Collins, Kimberly McIntyre, Elizabeth Arnold, Stacy Hinson, and Melissa Braxton	<b>Facilitator:</b>	Susie Sewell
		<b>Recorder:</b>	Candice Hudson

**PRIORITY GOAL:**(Desired outcome) Increase availability of mental health services to adults and children in Washington County

**STRATEGY:**(How to get desired outcome) Provide local access to mental health services

Major Milestone Activities/Action Steps <i>(What will be done?)</i>	Responsible Person <i>(Who will do it?)</i>	Completion Date <i>(When? Month/Yr.)</i>	Status <i>(Not started; on schedule; at risk; not on schedule; complete)</i>	Progress Comments <i>(Describe progress; barriers; successes)</i>
1)FDOH Washington County Preparedness will add Washington County School Board to the mass mailing list for information to be placed on the School mailing list for information to be placed on the School District Website for parents and facility access	Allison Blevins	10/1/20 & ongoing		
2)Assign an office space within the Washington County Schools for Life management to provide mental health counselling to children ages 8-18 year -old	Stacy Hinson and Elizabeth Arnold	07/01/19 & ongoing		
3)Obtain an office space with the Washington County Health Department for Life Management to provide Mental Health counseling locally for the community	Susie Sewell	TBA		
4) Accumulate a list of information on providers and locations where the community can receive Mental Health Service. Add this list to the WCSD website for easy access for the community	WCHIP members	05/30/20		
5)Youth Mental Health First Aid Classes to be taught to all Washington County SchoolBoard Staff	Elizabeth Arnold and Kimberly Register	12/31/19 & ongoing		
6)Improve number of referrals sent to Life Management by WCSD by implementing the referral form and process	WCSD & WCHIP members	08/12/19 & ongoing		

**How will you measure improvement?**  
Behavioral Risk Factor Data

SMART = Specific, Measurable, Achievable, Relevant & Timely

## WASHINGTON COMMUNITY HEALTH IMPROVEMENT Plan (CHIP) 2019-2024

**SMART Objective:** By May 31, 2024 have annual documentation from WCHIP members to support an increase in the amount of communication distributed to the public on available resources within Washington County. **Date:** May 31, 2019

**PRIORITY ISSUE AREA:** Communication

<b>Group Members:</b>	Arelly Sapp, Angela Klopf, Joel Paul, Suzan Gage, Renae Rountree, Kathy Foster, Brittney Sanders	<b>Leader</b>	James Lewis
		<b>Co-Leader</b>	Milton Brown

**PRIORITY GOAL:**(Desired outcome) Increase public awareness of resources that are available within Washington County.

**STRATEGY:**(How to get desired outcome) Develop plans on distribution of information and documentation of distribution.

Major Milestone Activities/Action Steps <i>(What will be done?)</i>	Responsible Person <i>(Who will do it?)</i>	Completion Date <i>(When? Month/Yr.)</i>	Status <i>(Not started; on schedule; at risk; not on schedule; complete)</i>	Progress Comments <i>(Describe progress; barriers; successes)</i>
1) Educate WCHIP members on 211	United Way/Angela Klopf	08/05/19	Completed	
2) Have WCHIP Communication committee meet to discuss distribution of 211 in Washington County	James Lewis/Milton Brown	08/30/19		
3) Develop a plan to have organizations submit their information to 211	Communications Committee Members	12/31/19		
4) Develop a plan for collecting and distributing information to the public	WCHIP members	05/31/20		
5) Develop a list of organizations that can share information on their web sites	WCHIP members	05/31/20		
6) Develop a list of resources that can be used to distribute information to the public	WCHIP members	05/31/20		

**How will you measure improvement?**  
Number of documented public communications.

**How will you continue to monitor the process?**  
By measuring the documentation.

SMART = Specific, Measurable, Achievable, Relevant & Timely

CHIP Meeting  
Minutes**

## Florida Department of Health Holmes & Washington

<i>Washington CHA Meeting Minutes</i>		
<b>Date: 06.03.19</b>	<b>Time: 9:00 am CST</b>	
<b>Leader: Karen Johnson</b>	<b>Next Meeting: August 5th from 9 to 11</b>	
<b>Recorder: Kathy Greene</b>		
<b>Attendees: See Sign-in Sheet</b>		
<b>Purpose: Establish priority areas for Washington County CHA/CHIP</b>		
	Community member introductions with program announcements	Karen Johnson
	Discuss CHIP Action Plans:  During the last meeting we put together 4 groups and developed action plans for each group. This is a 5-year plan we can add to or subtract from if there are other issues we want to address.  Communication – Deals with resources, dissemination and keeping the public informed, Mental Health – Availability & Resources Substance Abuse – Drugs & Alcohol Health Care Issues – Chronic Disease	Karen Johnson
	Health Care Issues – Chronic Disease & Obesity *Address Overweight Adults by implementing the National Diabetes Prevention Program, we have seen, between 8 classes, and on our tracking data, participants have had a 349lb weight loss and that is subtracting the gains provides evidence to support continued classes. *Search for other NDPP facilitators – Melissa Medley *Advertise and Market – ongoing by CHD, *Facilitate one to two NDPP programs each year, hopefully more but at the least one to two per year since it is a yearlong program. *Find funding to train more NDPP Facilitators – Melissa Medley *Promoting HOPE 8020 Online NDPP – will send link to organizations and people can sign up online to go thru the program and do it on their own. Right now, the program is free, Melissa has business cards for the CEO Mark West of the program and you can reach out to him and he will come talk to you and the offer is for anyone. – Melissa Medley Recreational Opportunities: Ways to get people more active. *Increase use of recreational trails, parks, kayaks and canoe launches by investigating locations in Washington County and make available to programs – Karen Johnson *Encourage use of Hiking and Trail Clubs and Kayak Clubs affiliated with the Florida Trail Association. – Karen Johnson *Possibly use the “Rethink your Dream” resources from the center for Disease Control in the schools to provide education as part of the Back to School Events Health Resource Action Plan *Nutritional Resources in the County – the WCHIP Group already developed a list of resources we just need to review and update and *Distribute to the public. – Group task *Ask organizations to share with the information – Group Task	Karen Johnson & Melissa Medley
	Communication – leader James Lewis Main goal is to increase communication and participation in community events. Ways to do that is compare participation in previous events. Increase number of advertised events and use all platforms out there for all age ranges. Action Steps is use non-traditional media – flyers, newspaper advertisements, faith-based organizations such as Back to School Bash’s, school systems, county systems & PSA media, press releases, School & County All Call Systems. Churches – Milton & James County – Karen Johnson PSA & Media – Brittany & Traci Monitor Media responses by hits and number of likes on the information.	Milton Brown & Brittany Sanders

	<p>Some programs use the West Florida Electric Coop Current Light Flashes since it goes out to 4 counties and approximately 28,000 people.          School Health Clinics can use on call and send flyers to parents          Tri-County hands out flyers to everyone, schools, electric company, head start, and occasionally run ads in newspapers.          Council on Aging – Facebook is the biggest outreach. Could possibly add it to the utility bill envelopes. Give information to the workers that go to the client's house.          Call local news and see if it could be added to their local public service announcements.          Agreement with City of Chipley to insert flyers in the bills.          USDA Food Giveaway at church can put information in the bags</p>	
	<p>Mental Health – Susie Sewell &amp; Candice Hudson          Karen Johnson, Keisha Collins &amp; Washington County School staff Kimberly Register &amp; Kimberly Macintyre and the School Counselor          *A lot of referrals sent to the LM and LM didn't know they were there, so there was a breakdown in communication and that was addresses. Worked on homelessness and no summer programs for students to get Mental Health. They receive it thru the school year and then during the summer break they don't. More Baker Acts this year in Washington County than ever before. Mentioned at meeting is missing parents, more children aged 20 or 21 raising children aged 5 to 10, with no access to any type of counseling. All children in that umbrella have a lot of mental health issues. No local place for children or families without driving to Panama City or Fort Walton.          Bay County was averaging 3 or 4 a month Pre-Michael and now its 1 a day Post Michael.          *Plan is to work on 2 action plans – 1 for local services and 1 for referral services.          Plan to meet again and work on development of Action Plan.          Life Management does not have enough staff to provide services but are looking for new staff          Next meeting June 18<sup>th</sup> in WCHD Conference Room.</p>	Candice Hudson
	<p>Substance Abuse – Traci Corbin          *Called around and ask about current resources and could not find a guide for Substance Abuse resources.          *1<sup>st</sup> step to provide guide of substance abuse centers and detoxification guides with a variety of centers and how do they pay. Address, phone number agency name, insurance, sliding scale fees and all options available. Create something that can be distributed on a one-page flyer that can be taken to events or put on social media. Research in WC if there is a resource guide and make sure they don't duplicate anything., get it in the hands of people to help distribute and update it yearly. Possible create substance abuse profile.          *2<sup>nd</sup> Getting the Resource Guide out there for everyone to use.</p>	Traci Corbin
	We'll put this information into packages to deliver to CHA & CHIP by August 31 <sup>st</sup> .	Karen Johnson
	Next meeting in August 5th, 2019 9:00 am at NWFL Community Hospital Specialty Building	
	Attachments: Sign-in Sheet
