EXECUTIVE SUMMARY

The mission of the Department of Health's Volunteer Health Services Program is to promote access to quality health care for the medically underserved and uninsured residents of Florida through the commitment of volunteers. The State of Florida has encouraged the use of volunteers within all state agencies. The Department of Health, realizing its limited resources and fiscal constraints, as well as the value of volunteers, advocates the use of volunteers to augment its public health functions. The Department's volunteers hold many positions that directly and indirectly benefit all Floridians.

From July 1, 2010, through June 30, 2011, the value of goods and services donated to the citizens of Florida through the Volunteer Health Services Program totaled more than \$268.4 million. With annual program expenditures of \$476,017, this is equivalent to a return on investment of \$564 in healthcare services to the underserved for each dollar of State funds expended. The Department's Volunteer Health Services Program promotes and provides technical support to the individuals and organizations providing these volunteer services. Appendix C contains a listing of the VHS staff and their assigned regions.

Since the inception of the Volunteer Health Services Program in 1992, the Department of Health (DOH) has documented more than \$2.0 billion in donated goods and services through the two volunteer programs administered by the Department. The majority of these contributions were directly related to medical and dental care provided to underserved and uninsured Floridians.

This annual report consists of three sections describing the contributions of many individuals and organizations participating in the two volunteer programs administered by the Volunteer Health Services Program of the Florida Department of Health. Chapter 110 of the Florida Statutes authorizes the use of volunteers in DOH facilities to extend the reach of the Department's public health initiatives (Appendix A). Section 766.1115 of the Florida Statutes, the Volunteer Health Care Provider Program (VHCPP), supports the use of volunteer healthcare professionals who donate their services to eligible clients (Appendix B). In exchange for provision of services under section 766.1115 and as agents of the State, these volunteer health care providers and clinics are covered by the sovereign immunity cap outlined in Section 768.28 of the Florida Statutes.

The VHCPP was implemented in 1992 by the "Access to Health Care Act" under Section 766.1115 of the Florida Statutes and includes contracted health care professionals associated with community or faith-based organizations. These volunteers are agents of the state, in that they provide services for clients referred from DOH and agree to certain contractual stipulations. This contract provides them with the same liability protection as state employees when they provide healthcare services. This program is a small but vital component in the Department's effort to increase access to health care for those in need throughout the state.

Additionally, the Medical Reserve Corps (MRC) is a group of volunteers that is called upon in times of crisis to provide healthcare to Florida residents. The MRC has been deployed during hurricane recovery, swine flu immunization, and other similar events. These volunteers are enrolled under Chapter 110 when activated by authority of the Department of Health. In recent years the MRC volunteers have expanded their volunteer participation to other public health

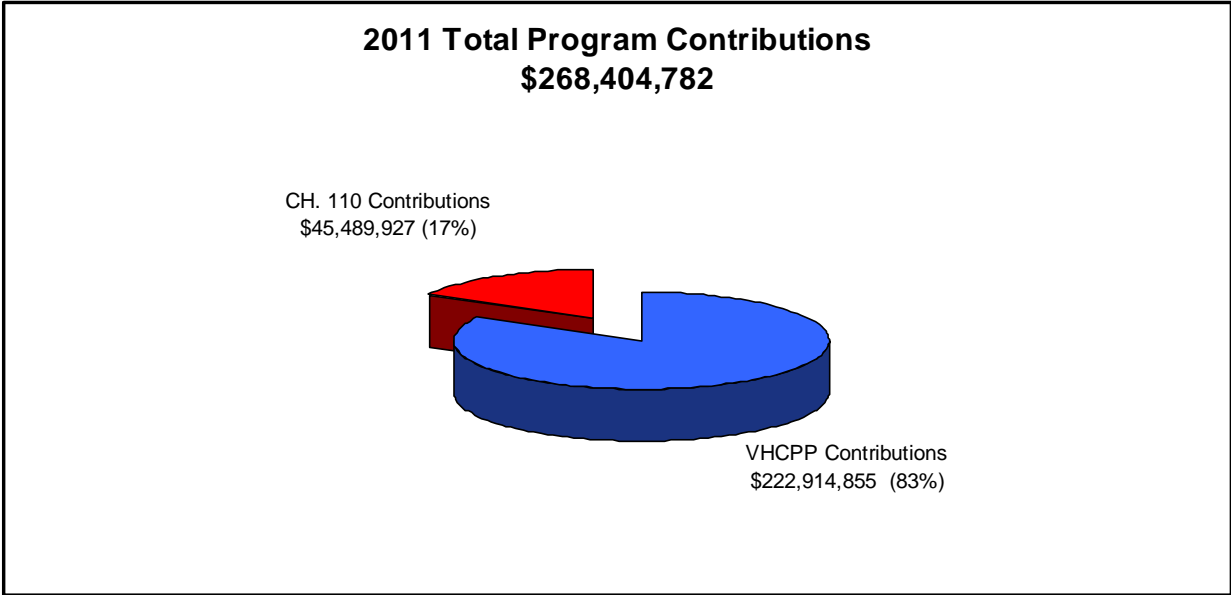

events as well. They are a valuable asset to the Department. The number of MRC volunteers, the hours volunteered and the total value of MRC contributions are included in the county health department report. Contributions of MRC chapters are broken out of the CHD figures, and highlighted in the table on page 6.

As required by section 766.1115(7) of the Florida Statutes, the Division of Risk Management compiles an annual report of claims under this program. This report, in the form of a letter, is contained in Appendix D.

The key to the continued success of these volunteer initiatives is the sustained support of the many generous provider organizations, professional associations, public/private partnerships, and individuals who commit to strengthen and develop collaborative relationships within their local communities.

The Florida Department of Health Volunteer Health Services Program is looking forward to continuing our support of the network of volunteer and charitable services highlighted in this report as we move into 2012, our twentieth year of service to the citizens of Florida.

SUMMARY OF CHAPTER 110 VOLUNTEER ACTIVITIES WITHIN DEPARTMENT OF HEALTH FACILITIES

The Department of Health recognizes that volunteers and public/private partnerships will continue to be an integral part of the effort to increase access to quality health care for Florida residents. This section of the report summarizes the contributions and donations made to the Department by a variety of volunteers as defined in Chapter 110, Part VI, *Florida Statutes*. The majority of goods and services are donated at County Health Departments (CHD) and Children's Medical Services (CMS) sites. During this reporting period, the Department documented the participation of 10,049 volunteers, contributing 659,074 hours of their time, for a total of \$45,489,927 in donated goods and services.

The Department of Health uses a broad range of volunteers and collaborations to augment existing local resources. These include, but are not limited to, licensed healthcare professionals providing direct patient care, technical personnel assisting in information technology units and environmental health-related areas, HIV/AIDS counselors/educators, language interpreters, and administrative staff providing clerical support. To support volunteer efforts the Department makes available many of its facilities to non-governmental organizations to provide healthcare education and services for residents of local communities.

The Department of Health offers a wide range of valuable educational opportunities. Several colleges and universities have contracted with the Department to permit students to complete their internships and/or clinical requirements in Department facilities. In addition, many educational institutions have partnered with the Department in support of health fairs, disaster preparedness and natural disaster events, immunization clinics, back-to-school physicals, and other events to improve the health of the community. A program involving volunteer nurses in public schools has been extremely successful in increasing the number of nurses available to address basic healthcare needs and health education of students in the state's school systems.

The documentation in the following tables demonstrates that the contributions of numerous individuals and public/private partnerships make a valuable contribution to the Department's mission and the services it provides to the citizens of Florida.

SUMMARY OF THE CHAPTER 766 VOLUNTEER HEALTH CARE PROVIDER PROGRAM ACTIVITIES

This section of the report documents the contributions made by participants in the Volunteer Health Care Provider Program (VHCPP). These activities are carried out under the terms and conditions specified under section 766.1115, *Florida Statutes*. The monetary values are a compilation of data reported by volunteer providers. 11,993 licensed healthcare professionals and 10,614 staff volunteers provided healthcare services for 400,899 patient visits with a total value of \$222,914,855. This includes in excess of \$78.3 million in donations from grants and gifts provided by various entities to many community and faith-based organizations.

Healthcare access for the underserved and uninsured residents of Florida, via this program, is completely dependent on volunteer providers donating services. The Department of Health is extremely thankful for the healthcare providers' commitment to this endeavor and acknowledges their positive impact on local communities. Vital to the continued success of this program are the support and sponsorship of the licensed healthcare professionals, community and faith-based organizations, public/private partnerships, the Florida Medical Association, the Florida Osteopathic Medical Association, and the Florida Dental Association. In many areas, healthcare providers and organizations have joined forces to develop extensive collaborations to support a complete, uncompensated, healthcare network for underserved residents in their communities.

Appendix B

766.1115 Health care providers; creation of agency relationship with governmental contractors.--

766.1115 Health care providers; creation of agency relationship with governmental contractors.-

(1) **SHORT TITLE**--This section may be cited as the "Access to Health Care Act."

(2) **FINDINGS AND INTENT**--The Legislature finds that a significant proportion of the residents of this state who are uninsured or Medicaid recipients are unable to access needed health care because health care providers fear the increased risk of medical negligence liability. It is the intent of the Legislature that access to medical care for indigent residents be improved by providing governmental protection to health care providers who offer free quality medical services to underserved populations of the state. Therefore, it is the intent of the Legislature to ensure that health care professionals who contract to provide such services as agents of the state are provided sovereign immunity.

(3) **DEFINITIONS**--As used in this section, the term:

(a) **"Contract"** means an agreement executed in compliance with this section between a health care provider and a governmental contractor. This contract shall allow the health care provider to deliver health care services to low-income recipients as an agent of the governmental contractor. The contract must be for volunteer, uncompensated services. For services to qualify as volunteer, uncompensated services under this section, the health care provider must receive no compensation from the governmental contractor for any services provided under the contract and must not bill or accept compensation from the recipient, or any public or private third-party payor, for the specific services provided to the low-income recipients covered by the contract.

(b) **"Department"** means the Department of Health.

(c) **"Governmental contractor"** means the department, county health departments, a special taxing district with health care responsibilities, or a hospital owned and operated by a governmental entity.

(e) If emergency care is required, the patient need not be referred before receiving treatment, but must be referred within 48 hours after treatment is commenced or within 48 hours after the patient has the mental capacity to consent to treatment, whichever occurs later.

(f) Patient care, including any follow up or hospital care, is subject to approval by the governmental contractor.

(5) NOTICE OF AGENCY RELATIONSHIP--The governmental contractor must provide written notice to each patient, or the patient's legal representative, receipt of which must be

acknowledged in writing, that the provider is an agent of the governmental contractor and that the exclusive remedy for injury or damage suffered as the result of any act or omission of the provider or of any employee or agent thereof acting within the scope of duties pursuant to the contract is by commencement of an action pursuant to the provisions of s.768.28. With respect to any federally funded community health center, the notice requirements may be met by posting in a place conspicuous to all persons a notice that the federally funded community health center is an agent of the governmental contractor and that the exclusive remedy for injury or damage suffered as the result of any act or omission of the provider or of any employee or agent thereof acting within the scope of duties pursuant to the contract is by commencement of an action pursuant to the provisions of s. 768.28.

(10) RULES--The department shall adopt rules to administer this section in a manner consistent with its purpose to provide and facilitate access to appropriate, safe, and cost-effective health care services and to maintain health care quality. The rules may include services to be provided and authorized procedures. Notwithstanding the requirements of paragraph (4)(d), the department shall adopt rules that specify required methods for determination and approval of patient eligibility and referral and the contractual conditions under which a health care provider may perform the patient eligibility and referral process on behalf of the department. These rules shall include, but not be limited to, the following requirements:

(a) The provider must accept all patients referred by the department. However, the number of patients that must be accepted may be limited by the contract.

(b) The provider shall comply with departmental rules regarding the determination and approval of patient eligibility and referral.

(c) The provider shall complete training conducted by the department regarding compliance with the approved methods for determination and approval of patient eligibility and referral.

(d) The department shall retain review and oversight authority of the patient eligibility and referral determination.

(11) APPLICABILITY--This section applies to incidents occurring on or after April 17, 1992. This section does not apply to any health care contract entered into by the Department of Corrections which is subject to s. 768.28(10)(a).
